### **FEATURE**

ARFF Crews Respond to the Front Line at Pentagon: When a hijacked Boeing 757, skimming the street lights, smashed into the Pentagon on September 11, firefighters at nearby Reagan National Airport were the right responders in the right place with the right equipment.

### **UPDATE**

### **FDNY Officials Want More Firefighters to Wear Respirators:**

The so-called "World Trade Center cough" that rescue workers are now experiencing could've been limited if the first responders to the World Trade Center attack had more than hardware-store dust masks available to them. Dr. David J. Prezant, deputy medical officer for the New York City Fire Department, and fire officials want quicker access to light-weight breathing apparatus and for more firefighters to protect themselves by wearing respirators. Read more about NFPA standards for equipping first responders. (PDF\*, 218 KB)

# from the magazine

Note: The first <u>five cover stories are</u> <u>available in one PDF file</u> (NFPA members only). (1.4 MB). <u>Not a member</u>?

Collapse: World Trade Center
Aftermath - Engineering experts to
study the WTC events in a search for
answers to why the buildings collapsed.
Evacuation - NFPA will revisit previous
WTC study with an evacuation behavior
follow-up.

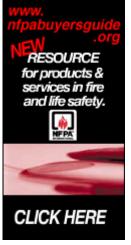

Click to see bigger image.

**Search and Rescue -** NFPA standards guide the way officials search for WTC survivors and victims.

**Terrorism: Impetus for Change -** NFPA examines its role of providing fire service with standards that aid the response to terrorism.

**First Responders -** The real thing shows the need to refine first-responder preparedness and protective equipment for terrorism attacks.

**Looking Back...at Heroes -** Among the dead in the World Trade Center collapse were eight members of our NFPA family. <u>More...</u> (PDF\*, 85 KB) (NFPA members only)

### A Day with the Heroic Firefighters of FDNY

<u>Fellow firefighter understands why they placed themselves in harm's way at the World Trade Center inferno.</u>

### **FEATURES**

**U.S. Firefighter Injuries of 2000 -** <u>Last year, 84,550 firefighters</u> were injured, the lowest number since 1977. (NFPA members only)

**Large-Loss Fires of 2000** - <u>The costliest fire of 2000 resulted in a direct property loss of \$1 billion</u>. (NFPA members only)

Fire Watch: Sparks from cutting torch ignite warehouse in Maryland.

### **COLUMNS**

**Buzzwords:** Defining the `Best´ System - <u>Using NFPA codes helps ensure the reliability of the fire alarm systems you design and <u>develop</u>.</u>
